WE LOVE THE GREAT OUTDOORS. THEN AGAIN, WHAT OTHER KIND IS THERE?

We hail from Canada. Home to some of the deepest forests, tallest mountains, biggest cities and most extreme seasons. It's the best backyard in the world.
So we get out there. A lot.

We believe everyone should experience the outdoors. And so we make footwear that helps people do exactly that. We know that if you're going to play outside all day, you'd better be prepared with footwear that can do the same. Boots that keep you warm, dry and comfortable are not luxuries, they're necessities. And so everything we do — from design to manufacturing to distribution — is aimed at making sure that you can offer a range of high quality, well-designed and protective boots, all at an unbeatable value. That way your customers can get outdoors knowing that their feet are taken care of in every way possible.

So, Mother Nature, bring everything you've got. Whether it's the cold, the rain or the snow, we'll take it all and love every minute of it. After all, that's what we've been doing for the last 117 years.

kamik 

kamik 

kamik

WHEN WE'RE NOT OUTDOORS, WE'RE IN THE FACTORY.

WE BELIEVE THAT OUR FACTORIES, BOTH DOMESTIC AND ABROAD, ARE WHERE GREATNESS HAPPENS. FOR THREE GENERATIONS, THEY'VE BEEN WHERE THE ELEMENTS OF DESIGN, TECHNOLOGY, MATERIALS AND INNOVATION COME TOGETHER IN AN EXPERT'S HANDS. FOR US, MANUFACTURING FOOTWEAR ISN'T JUST WHAT WE DO, IT'S AN UNSHAKEABLE PART OF WHO WE ARE AS A COMPANY.

We believe everyone benefits from our dedication to having the majority of our manufacturing done so close to the communities where we sell our products. This tight connection allows us to:

- + Quickly prototype innovative products and technologies
- + Develop more sustainable manufacturing processes
- + Ensure every boot that leaves our factory is high quality and a great value

Today, we make products around the world, and stay true to our roots of quality and great value in everything that carries the Kamik name. We make 70% of our footwear at home in Montreal and in Littleton, NH. Based on marketplace demand from retailers and consumers we're currently adding to our USA manufacturing operations as part of our ongoing investment in manufacturing products here in North America.

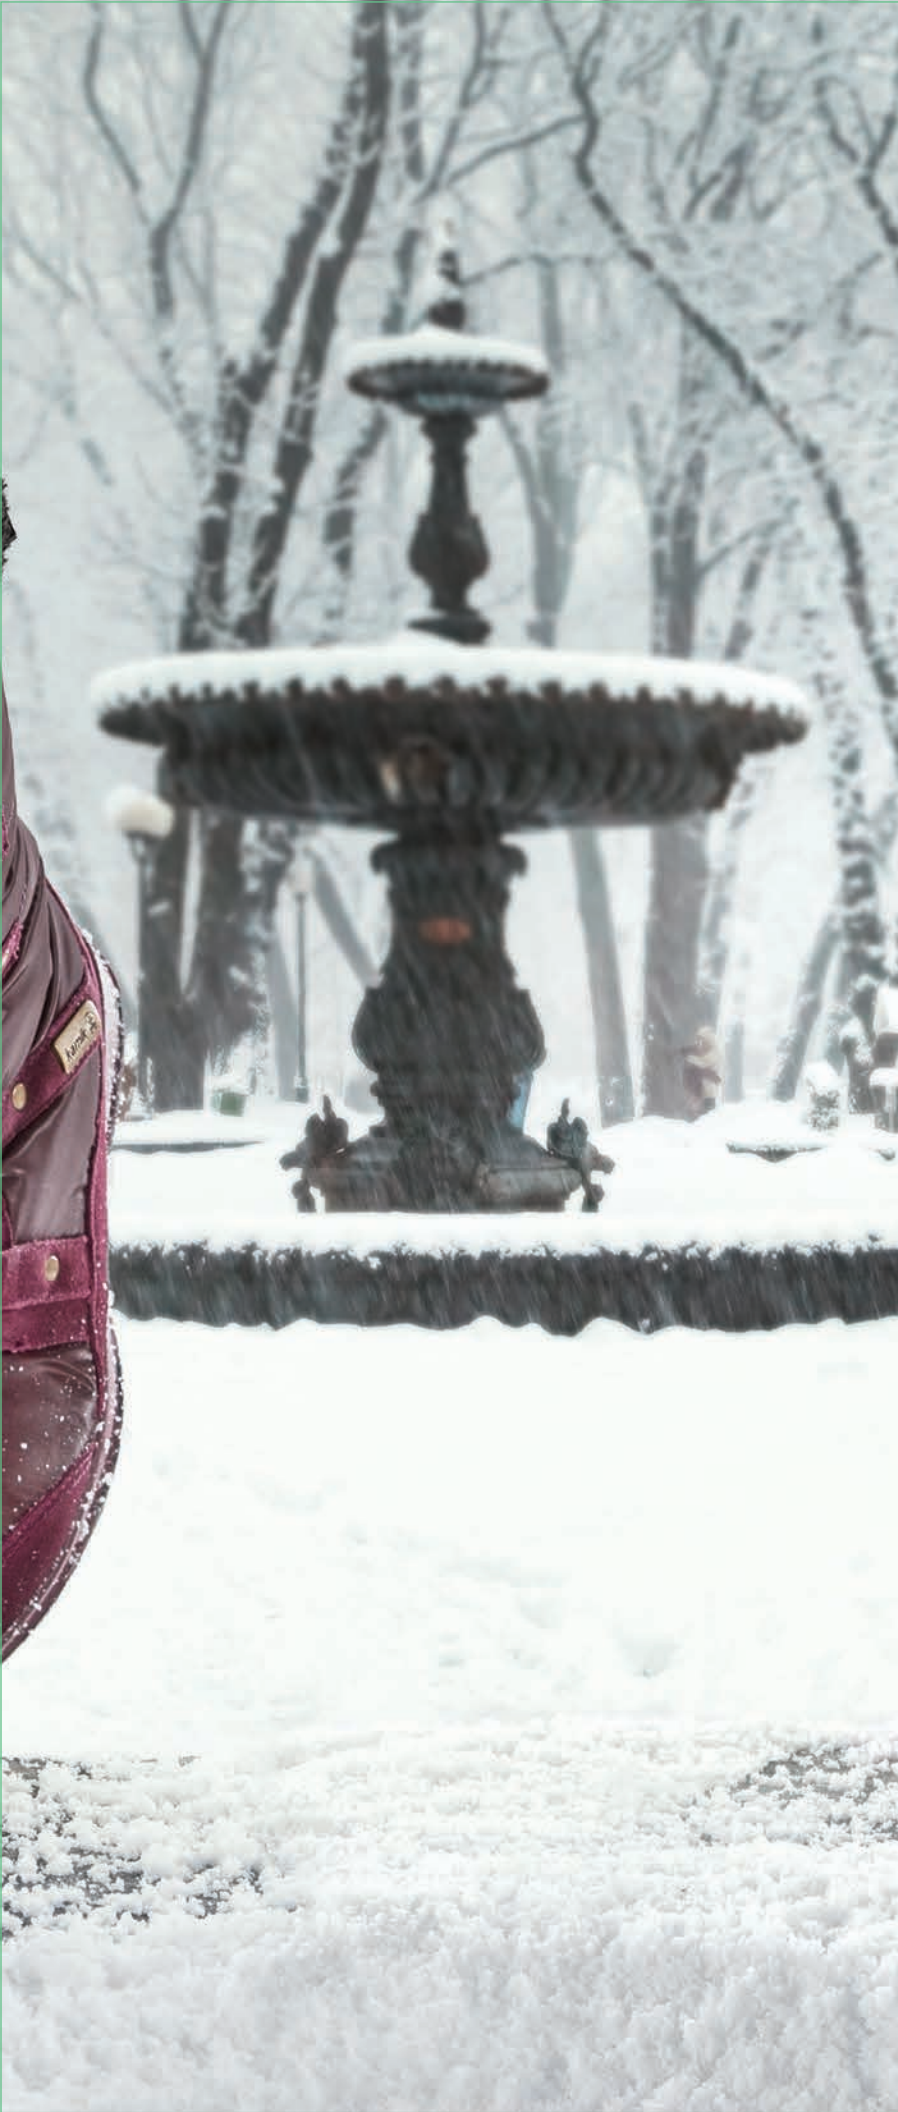

We've been North American manufacturers for more than 100 years and we'll continue to be North American manufacturers who promise quality, detail and performance for the next 100 to come.

SUSTAINABILITY

MAKING BOOTS THAT MAKE PROGRESS.

A big part of venturing into the great outdoors is having respect for everything in it. That way we all can continue to enjoy it for years to come. For more than 20 years, we've been working to protect our environment through sustainable manufacturing processes. Over the years, we've even changed the composition of our footwear to include 70% recycled material. And we continue to source and develop new materials, like our proprietary Rubber^{He}, that are better for the environment and our customers.

WOMEN'S COLLECTION

Places to go.
People to see.
Boots to love.

From the morning commute to an afternoon outside with the kids, women demand a lot from their footwear. And our 2015 women's line was built to answer that need.

Designed with the latest technology and materials, colors and textures, these collections complement her style, and life. Inspired by the runway, city streets and our own Montreal backyard, they feature deep and saturated blues and burgundies with similar accents for a pop of color, natural hues with rich styling, as well as new and assorted heights, lacing systems and distinctive upper materials to suit a variety of tastes.

But of course, it's about more than looks. Which is why every pair is packed with features to keep her warm, dry, protected and comfortable on the go — including new Polartec® Alpha® and Neoshell® —waterproof, active insulating and breathable technologies. No matter what she needs or where she goes, our products provide the right combination of style, protection and value.

METRO

This is our most sophisticated collection for busy women on the go during the colder winter months. The Metro Collection combines superior design with a sleek outsole and silhouette. Plus, unique features and technology such as Polartec® Alpha® and Neoshell® keep her warm, dry and comfortable whether she's going to work, running errands or stepping out with friends.

NOTES:

PEAK

For those who do it all, these boots have it all. The Peak Collection is a contemporary take on our classic styling, with a more modern silhouette and less bulky materials. It offers uncompromising comfort, superior protection and great value. Made with 3M™ Thinsulate™ insulation, seam sealed waterproof construction and a winterized outsole tread, feet stay warm, dry and comfortable. We also added an extra midsole for more cushioning than ever to keep her out and enjoying a day outdoors or a weekend away.

NOTES:

RAIN

The Women's Rain Collection was designed for women looking for stylish boots that can perform extremely well on those cold, wet days from late fall to early spring. This collection is designed to do just that – with trendy prints and color tones, key features like waterproof technology, polar fleece lining for warmth and Rubber^{He} to keep them light.

NOTES:

SLIPPERS

The warmth and comfort she expects from Kamik boots is now available in a slipper. This collection was inspired by chilly winter mornings and those evenings when she just wants to cozy up in front of the fireplace, and was designed to easily slip on and off.

MEN'S COLLECTION

For us, the road
less traveled
isn't even a road.

Our Men's Collection is all about charting new territory. It's for those who need to get out there and need footwear they can trust to protect and perform, no matter what the conditions. This year, we've expanded our Men's line to include even more products and technology that your customers can trust to deliver, especially in the challenging weather from late fall to early spring. The 2015 line includes performance and outdoor casual footwear built to handle all sorts of activities and conditions, whether it's a long winter hike, a mountain of snow to shovel or a challenging workday. With collections that feature a variety of styles and classic looks and proprietary technology like LockFIT, as well as Zylex® and Rubber^{He} to keep men warm, dry and comfortable, your customers will be able to go anywhere and know they're wearing some of the best boots out there.

ELEMENTS

Our most versatile collection, it fits like a shoe and protects like a boot. With LockFIT technology, a patented construction process that forms an extremely comfortable and supportive fit, and other features like lightweight Rubber^{He}, waterproof technology and an outsole designed to grip wet, slushy or icy surfaces, this collection will keep your customers comfortable, warm and protected from late fall to early spring.

+ STYLE: COLD CREEK

kamik 

WE'RE CONSTANTLY TRYING TO BUILD A BETTER BOOT. WE'RE ALSO CONSTANTLY SUCCEEDING.

3-SEASON FEATURES

This boot's unique three-season features keep it steps ahead of the competition.

A ALL-WEATHER COLLAR

With our patented Easy Grab Lace Lock. While other neoprene boots have wide openings at the top of the boot, our adjustable collar closes tight, keeping elements out and heat and body odor in. Roll down the shaft of the boot to reveal an orange safety lining for even more protection.

B ALL-WEATHER OUTSOLE

- + Grips and disperses snow, slush and rain.
- + 100% waterproof thanks to a Rubber^{He} shell, neoprene layer and double taped seams.

LOCKFIT

A patent-pending construction process that cradles, supports and locks the foot in place to provide the most comfortable fit possible.

30% LIGHTER

Rubber^{He} is a Kamik exclusive rubber technology that's the perfect material for a three-season boot. Extremely lightweight, all Kamik Rubber^{He} is designed, developed and made in North America. And even though it's lighter than the competition, Rubber^{He} still offers the same durability and protection of natural rubbers, yet is completely unaffected by temperature. So these boots maintain their flexibility and traction in any condition, whether hot or cold. For more on Rubber^{He}, go to the technology section page 121.

ADVANCED OUTSOLE

Advanced outsole keeps feet firmly planted on the ground.

TRACTION

- 1 Water channels: Disperse water and increase traction, boot will not hydroplane due to full side-to-side grooves.
- 2 Grooved heel pad: Reduces slip, allows water to disperse, and creates a soft touchdown at heel to enhance traction.

STABILITY

- 3 X shank: Positioned underneath the surface to offer maximum support when climbing a tree stand or walking over uneven surfaces.
- 4 Large flat surface area provides traction on flat ground and flat rocks.
- 5 Center lugs: Provide enhanced cushioning and traction by putting more tread on the ground.
- 6 Mini spikes: Provide additional traction on sticks, stones and uneven, choppy terrain.

NOTES:

AOP

This collection stands for Advanced Outdoor Performance. And it delivers. Built for activities like snowshoeing, trail walking and tobogganing, all styles are waterproof, durable and outfitted with the technologies your customers demand. Including a 3-piece shell and bottom for extra cushioning and support and 3M™ Thinsulate™ lining that's Comfort Rated to -40°/-40°. It's a whole lot of boot to keep them out there when the temperatures drop.

PEAK

Winter is more than a season, it's a sport. That's why we created the Peak Collection. An athletic update on our Classic Collection, the Peak Collection provides all the warmth, styling and protection your customers need for extended outdoor activities like winter camping, sledding or après ski. With lightweight construction and extra cushioning and support, it offers the performance sensibilities of an athletic shoe as well as the all-out protection of a winter boot.

NOTES:

CLASSIC

We call these boots classic for a reason. Their tried-and-true, no fuss design and construction continues to be trusted to keep feet warm and protected no matter what the weather. In fact, they're great for everything from a day out ice fishing to a leisurely day outside with the family. This collection features some of our warmest and most protective styles, with technologies like Zylex®, seam sealed waterproof construction and lightweight Rubber^{He}, and is built to stand up to the worst conditions Mother Nature has up her sleeve.

GAME

Hunting is a lifestyle. It's about the journey and the experience. Like taking in the beauty of the scenery, waiting for that big buck or bull caribou, and spending time with family and friends. We know nothing ruins the hunt faster than cold, wet feet. That's why it's our mission to help hunters stay out on their journey as long as possible, no matter the weather or landscape. This collection provides superior comfort, as well as features to keep feet warm and dry.

KIDS' COLLECTION

We let kids
be kids.
And parents
be parents.

The styles and comfort kids want. The protection and value parents demand. Our 2015 kids' line carries on our tradition of developing winter footwear that both you and parents can trust to keep kids warm, dry and comfortable from sun-up to sundown, all season long. New Boa Lacing technology allows younger kids to easily adjust and secure their boots and quickly get out the door. And proven technologies like NiteRays, Zylex® and Rubber^{He} provide the utmost in warmth, comfort and protection to keep them playing outside all day long. With updates to the line including specific boy and girl patterns, assorted heights, lacing systems and closures, as well as an array of designs and tread patterns, there's sure to be style and features for everyone to love.

ELEMENTS

Parents want their kids to get out there and enjoy the outdoors, while staying warm, dry and comfortable in the process. Now there's a boot that will do that for more than just the winter. The Elements Collection offers the first true three-season boots, with features that will keep them outside from September to April. 100% waterproof, 23% lighter than the competition, a stable, snow-gripping outsole and, depending on the model, an all-weather collar or our practical no-hole weather handles. Our Elements Collection is for all kinds of weather, keeping little feet protected every step of the way.

+ **STYLE: BLUSTER2**

kamik 

WE'RE CONSTANTLY TRYING TO BUILD A BETTER BOOT. WE'RE ALSO CONSTANTLY SUCCEEDING.

3-SEASON FEATURES

This boot's unique design and construction keep it steps ahead of every other neoprene boot on the market, making it perfect for fall-to-spring use.

A ALL-WEATHER COLLAR

While other boots have open tops, our adjustable collar closes tight, keeping elements out and heat in.

B NO HOLE HANDLES

Instead of cutting holes into the boot to create handles, we've attached handles. No holes on the side of the boot means rain, snow and slush stay outside. While kids can still get the boots on and off in a flash.

C ALL-WEATHER OUTSOLE

- + Grips and disperses snow, slush and rain.
- + A 100% waterproof Rubber^{He} shell, neoprene layer and double-taped seams combine to form a 100% waterproof boot.

23% LIGHTER

- Waterproof • Lightweight • Flexible in all temperatures

Rubber^{He} is a Kamik exclusive rubber technology that's the perfect material for a 3-season boot. Designed, developed and made in North America, Rubber^{He} is extremely lightweight. In fact, it's so lightweight that it makes boots in our Elements collection 23% lighter than the competition's. Plus, Rubber^{He} offers the same durability and protection of natural rubbers, yet is completely unaffected by temperature. So these boots maintain their flexibility and traction in any condition, whether hot or cold. For more on Rubber^{He}, go to the technology section page 121.

ADVANCED OUTSOLE

TRACTION

- 1 Larger toe and heel pad increase traction, grip and durability.
- 2 Multi-diverse tread shapes with angled edges assist with braking, speeding up and grip on snow, mud and ice surfaces.

STABILITY

- 3 All-weather tread design with angled grooves is designed to disperse snow, mud and water and reduce slip hazard.
- 4 Bigger, stiffer lugs placed at the arch provide more support and stability.

FLEXIBILITY

- 5 Center lugs enhance flexibility for more natural movement.

NOTES:

CLASSIC

Kids keep it pretty simple. Play, play and more play. And so does our Classic Collection. Trusted for generations to get kids outside to enjoy all that winter has to offer, this collection is full of features that won't slow them down. From Boa Lacing technology that will get them quickly out the door, to NiteRays, Zylex®, Rubber^{He} and waterproof seam-sealed technology that will keep them warm, dry, comfortable and protected all day long. It's all about letting kids focus on what's most important. Being a kid.

SONIC

The Sonic Collection is for kids who are looking for a more mature and athletic feel in their footwear. They don't let winter slow them down when it comes to getting outside and playing with friends. Outfitted with athletic styling, the warmth of 3M™ Thinsulate™ insulation, the waterproof protection of DriDefense and the reflective technology of NiteRays, this collection gives kids a winter boot that's big on fun and small on compromise.

NOTES:

TRAIL

Little hikers need serious gear, too. That's where our Trail Collection comes in. With a combination of DriDefense or Gore-Tex and 3M™ Thinsulate™ insulation technology, their little toes stay warm, dry and protected in all kinds of weather — whether it's light snow or a cold and wet day, and from late fall to early spring.

TODDLERS' COLLECTION

*The Snowjoy is a really nice boot,
It has great style that sure is cute.
The waterproof nylon and rubber^{He} bottom,
Keeps me dry for both the winter and autumn.
The two velcro straps do open up wide,
So mom and dad can get my feet inside.
There's a removable liner and faux fur collar too
So I can stay stylish and warm up until -32.
Now that the cold weather has almost arrived,
Waste no time and please buy me my size.*

Poem by Daria Tonini —
Little Goddaughter of Davide Degano,
Product Manager for Kamik

TODDLERS

Little feet need big protection. That's the idea behind our Toddler Collection. Thermal Guard liners provide superior warmth and Rubber^{He} and Gore-Tex keeps them protected and dry so little ones stay happy. Plus, they're extremely easy to get on and off. Because parents and toddlers are always on the go.

NOTES:

WATERPROOF TECHNOLOGY

+ 100% Waterproof

Our proprietary waterproof membrane allows moisture from the foot to escape, without letting any water in, keeping feet warm and dry, wherever the journey takes you. 

This technology makes boots practically impenetrable to snow and moisture without adding any weight to the footwear. By specially treating our leathers and nylons, then using waterproof tapes and sealants to cover every seam, it's like feet are wrapped in a waterproof cocoon. So they stay safe and dry.

This legendary waterproofing technology is as breathable as it is impenetrable. That means while water and snow can't get in, sweat can get out. That helps keep feet as dry and comfortable as possible, no matter what the conditions or outdoor activity.

Polartec® NeoShell® is an engineering breakthrough for waterproof breathable fabric technologies. Dynamic air exchange at the surface provides the unrivaled ability to stop water and wind permeation without restricting the release of excess body heat and moisture vapor. This highly aerobic air permeability provides the unique benefit to function as a durable protective shell with advanced wicking capabilities to keep moisture vapor moving away from your core.

ADDED PROTECTION

Our patented knob on the bungee lace makes boots easy to adjust before and after going out. 

Canadian patent: 2,257,737 / US patent: 6,237,252

A reflective binding or patch on the boot for added safety after the sun sets. 

LOCKFIT

A patent-pending construction process that cradles, supports and locks the foot in place to provide the most comfortable fit possible. 

This microbe shield is a revolutionary technology that provides protection against odor, bacteria, fungus and other microorganisms that can take root in boots.

With a quick turn of the Boa dial, this unique closure system helps little ones get boots on and off in a matter of seconds. Combined with the ease of on-the-fly adjustments, the Boa closure sheds water, mud and ice, shaving precious weight, delivers a glove-like feel, and keeps feet locked into place for custom, all-day comfort. Makes it easy for kids to quickly adjust and secure boots even with mittens or gloves on.

GORE-TEX® SURROUND™ product technology is the first and only technology to make possible all around breathable and durably waterproof footwear. Sweat is channeled away from the foot via the patented open construction. Moisture and warmth can escape from below the foot through the ventilation outlets in the sole. The result is dry feet, both from inside and outside. GORE-TEX® SURROUND™ footwear is an excellent choice for moderate to warmer temperatures.

TRACTION

- + 50% lighter than natural rubber
- + 30% lighter than synthetic rubber
- + Superior traction
- + Flexible in all temperatures
- + Recyclable and PVC-free
- + Oil and acid resistant

At the forefront of all our technologies is Rubber^{He}. It's light like helium, yet strong like iron. We spent two years in our Montreal lab developing and perfecting this incredible lightweight technology. It offers the protection of a traditional pack boot with a lot less weight to lug around.

ICE LOCK

A patent-pending technology that dramatically increases a boot's traction on ice. Micro glass filaments are electrostatically aligned in the rubber compound, creating slip-stopping tension.

WARMTH

COMFORT TEMPERATURE RATING

With Comfort Temperature Ratings, you can best match our boots with your customers' needs and activity levels. Our boots are tested internally to meet our high standards and then retested at an outside facility to achieve certification. All to make sure they can keep feet warm in the harshest conditions.

WARMTH

Proprietary four-layer system that provides maximum warmth. This has all the benefits of our Zylex liners, with an additional insulation layer that traps warmth and conforms to the foot.

Kamik's proprietary three-layer system that keeps feet warm, dry and comfortable. The first layer wicks moisture away, the middle layer traps heat and the outer layer deflects cold air yet allows moisture to escape.

Our traditional two-layer liner. The first layer wicks moisture away from the foot, while the second traps warmth to keep feet warm and dry.

Developed by 3M, this innovative microfiber insulation provides a large surface area that traps body heat. It delivers warmth two times more effectively than down or any other polyester insulation when equal thickness is compared.

Originally developed for the U.S. Special Forces, it incorporates new technology with active insulation that regulates core body temperatures during both dynamic and static activities. This advancement helps eliminate the need for shedding or adding layers while on the move.

SOME MEASURE WARMTH BY THE DEGREE. WE MEASURE IT BY THE MILE.

We don't just put technology into our boots. We also make sure our liners are packed full of it.

For over 100 years, we've been experts in developing and manufacturing liners that stand up to the harshest conditions in the world. After all, when it comes to keeping feet warm and dry, it's not just what's on the outside that counts.

THE ULTIMATE IN WARMTH & PROTECTION

1 MOISTURE-WICKING LAYER

Interior layer wicks perspiration and moisture away from the foot to keep feet dry.

2 INSULATION LAYERS

First layer traps body heat in natural air pockets.

Second layer traps warm air while conforming to the foot.

3 THERMAL BARRIER LAYER

Outer layer deflects cold air from the outside while reflecting body heat back to the foot.

4 & 5 REINFORCED HEEL AND STITCHING

Reinforced seams & heel guard provide superior durability.
